

2021 Wrap-up

Road Rangers Convert to Bi-fuel Propane Vehicles

First Coast Road Rangers is a free service provided by the Florida Department of Transportation. Whether it's helping motorists who've run into trouble on the road or helping police re-route traffic after an accident, they're the ones behind the scenes, making sure our neighbors are as safe as possible on our state's highways and expressways.

Marshall Adkison, President and CEO of First Coast Road Rangers, saw the environmental and monetary benefits of alternative fuels. After researching options, he converted his fleet to bi-fuel propane. The fuel cost savings were used to increase his employees' pay and provide medical insurance.

We shared Marshall's story in a webinar with other fleet managers and produced a short video so others could learn from his experience. **You can view our videos and webinars at nfcvideo.com.**

Alternative Fuels for Paratransit

Paratransit services for those who cannot use fixed route transit are provided by county Councils on Aging and JTA Connexion service across our region. This type of service requires a more extensive array of vehicles and is more costly to operate per rider than fixed route buses.

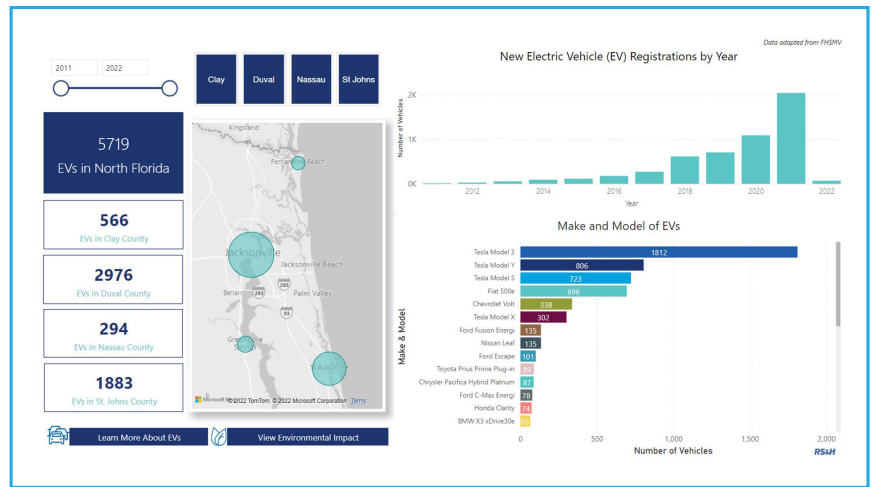

We teamed with the Southeast Florida Clean Cities Coalition to provide an educational webinar for our local paratransit providers. Paul Strobis, Broward County Transit Director of Paratransit, explained how his agency saved \$8 million over five years by switching to propane Autogas.

North Florida Clean Fuels Coalition EV Dashboard

The North Florida Clean Fuels Coalition launched an EV dashboard to provide data on vehicles, gasoline and emissions reduction, and access resources on vehicles, incentives and charging stations. Dashboards for additional fuels/data are in development.

Events Around Town

Smart North Florida Tech and Beer

Smart North Florida Tech and Beer Meetup attendees checked out an electric Porsche Taycan and learned about EVs with Coalition staff.

Jacksonville Environmental Symposium

Co-Coordinator Elizabeth De Jesus presented a Coalition overview and briefing on current activities.

JAX Chamber Transportation & Logistics Council

The T&L Council welcomed us to present updates on clean fleets and conversions.

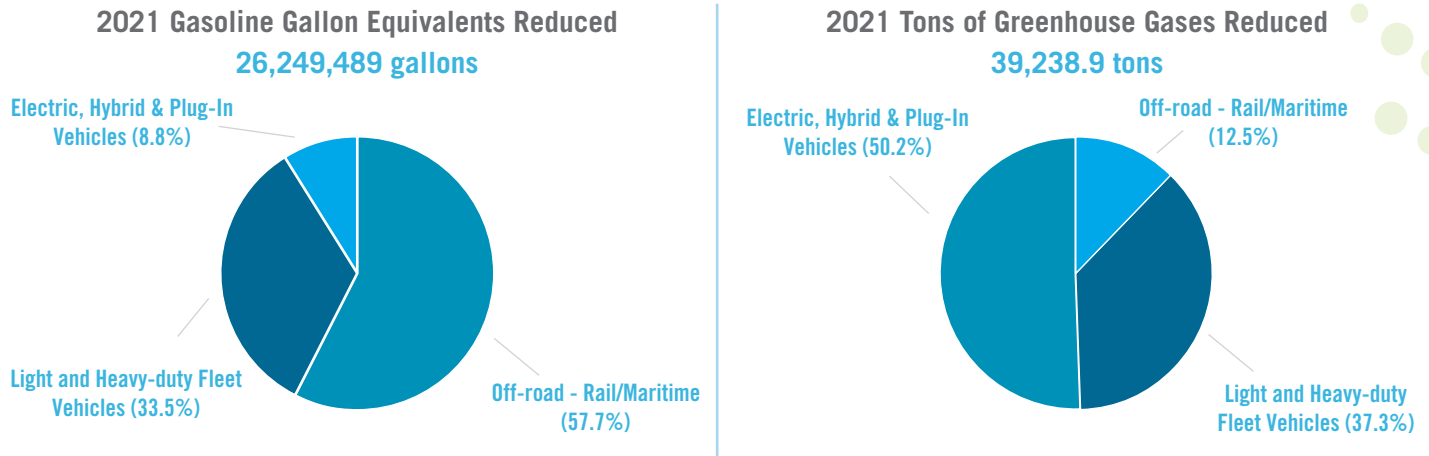

National Drive Electric Week

The Coalition joined our partners JEA and JTA at the Museum of Science and History to share information and provide ride and drive opportunities.

North Florida Clean Fuels stakeholders reported a savings of over 26 million gasoline gallon equivalents and over 39 thousand tons of greenhouse gases by using alternative fuels in 2021.

2021 Annual Survey Reported Fuel Use

Cumulative Totals Reduced 2016-2021

Clean Fuels Fleet Consults

Our leadership and technical consultant worked with the staff in Nassau and St. Johns counties, and the City of Neptune Beach to explore alternative fuel opportunities for their government fleets.

If you are considering a fleet conversion or investing in alternative fuel infrastructure, reach out to Co-Coordinator Elizabeth DeJesus and Marci Larson, and we'll connect you with our experts.
