Existing Plus Committed (E+C) Network

To determine which roadway projects are initially needed, an Existing plus Committed Network is established. The Existing plus Committed Network is comprised entirely of major arterial and collector roads within the study area, plus new or expanded (committed) roadways funded for construction between 2018 and 2021.

The North Florida TPO's FY 2016-2020 and FY 2017-2021 Transportation Improvement Programs, local government Capital Improvement Programs, Jacksonville Transportation Authority's Transit Development Plan and the FDOT's Five-Year Work Program were reviewed for capacity projects meeting the prescribed criteria to be considered committed.

A comprehensive list of the projects that are considered committed are shown in Table 1. The committed projects for the 2045 LRTP Update are depicted in Figures 1-4.
